

COPPER GREASE

Date: 20.08.2018

	I – IDENTIFICATION OF TH	E PRODUCT AND COMPA	ANY			
Trade Name	COPPER GREASE					
Purpose	Multipurpose copper grease for joints					
Producer	VMPAUTO LLC					
Address	Promyshlennaya str. 40A, 198095, Saint-Petersburg, Russia					
Tel/Fax: E-mail	+7 (812) 601-05-50 /	601-05 59, export@vmpau	ıto.com			
		IDENTIFICATION				
Hazard Indication	of dangerous substantial F+ flammable	be marked according to «Ences»	EU General Directive	e of classification		
Hazard for health	Product is safety packed in hermetic aerosol bottle. Dangerous influence to human can appear if application does not conform instruction of application and if aerosol bottle was damaged by overheating or mechanical impact.					
		IPOSITION				
Chemical composition	Product is a composi	tion of:	1	T 1		
	Component	Identification	Hazard Identification	Content, %		
	Propan	CAS: 74-98-6		10-15		
	Butane	CAS: 106-97-8		15-20		
	Copper powder	CAS 7440-50-8		10-17		
	Lubrication oil	CAS: 74869-22-0		other		
	Bentonite			10-17		
	IV - FIRST-A	ID MEASURES	•			
Conoral information	Is in most becomes a con-	المراج المحمد والمام والاستام والاستام والاستام والاستام	landina noralitiana			
General information Eyes		r health under normal applicing quantity of water durin		tation continues		
Lycs	consult a doctor.	org quartity of water duffit	g 10 minutes. ii iiii	auon continues,		
Skin		Take off dirty dress. Polluted skin washout with soap. Under normal use doctor's				
Anatomical	consultation is not necessary. Go outside. If breathing is difficult – consult a doctor.					
Anatomical airways Digestive system	Cure is not necessary. Exception is sudden swallowing of big quantity of product. If					
Digestive system	health is worth, cons	health is worth, consult a doctor.				

Firefighting tools Carbon dioxide and powder fire extinguishers. Special hazard Risk is not identified. Prohibited means carbonic-acid gas, monoxide carbon Means of individual protection Protective suit, respirator, isolated gas mask. VI-MEASURES OF PREVENTING AND LIQUIDATION OF ACCIDENTS AND EMERGENCES In case of definition that one or more bottles are non tight it is needed to delete defected bottles on open space. In case of gas leaks protect anatomical ariways. After gas leak reclaim bottles. VII-STORAGE REGULATIONS OF CHEMICAL PRODUCTION AND ITS TREATMENT UNDER HANDLING OPERATIONS General safety rules Under normal use of the product is stable and does not require special protective equipment. Do not use near fire and hot surfaces. Do not smoke Handling It is not necessary under normal use. Recommended materials It is not necessary under normal use. It is not necessary under normal use. VIII-CONTROL MEASURES FOR HAZARDS AND MEANS OF INDIVIDUAL PROTECTION General information Under normal use of the product preparation, product is stable and it doesn't require special protective equipment. Preparation of the product is related to hard-combustible and hot-toxic products. Protection of breathing It is not required under right application. Protection of skin It is not required under right application. Protection of skin It is not required under right application. Protection of skin It is not required under right application. Protection of breathing Not dentified Not sharp smell Meting point Not dentified Colloid stability, Mass of separated oil, % 10 Flammability Rot self-flammability Not self-flammability Not self-flammability Not soluble The creation of explosion substances with air is possible during usage Explosion limits Over 1.8% Over 1	V- MEASURES AND MEANS OF PREVENTING FIRE AND EXPLOSION HAZARD					
Prohibited means carbonic-acid gas, monoxide carbon Means of individual protection Protective suit, respirator, isolated gas mask. VI- MEASURES OF PREVENTING AND LIQUIDATION OF ACCIDENTS AND EMERGENCES In case of definition that one or more bottles are non tight it is needed to delete defected bottles on open space. In case of gas leaks protect anatomical airways. After gas leak reclaim bottles. VII- STORAGE REGULATIONS OF CHEMICAL PRODUCTION AND ITS TREATMENT UNDER HANDLING OPERATIONS General safety rules Under normal use of the product is stable and does not require special protective equipment. Do not use near fire and hot surfaces. Do not smoke Handling It is not necessary under normal use. Storage Keep away from fire and sunlight Recommended materials It is not necessary under normal use. VIII- CONTROL MEASURES FOR HAZARDS AND MEANS OF INDIVIDUAL PROTECTION General information Under normal use of the product preparation, product is stable and it doesn't require special protective equipment. Preparation of the product is related to hard-combustible and low-toxic products. Protection of breathing It is not required under right application. Protection of skin It is not required under right application. Protection of skin It is not required under right application. Protection of skin It is not required under right application. Protection of hands Use rubber gloves. It is not required under right application. Protection of hands Aerosol grease Color Brick color liquid Smell Not sharp smell Mething point Not identified Colloid stability, % mass of separated oil, % 10 Flammability Not identified Colloid stability, % mass of separated oil, % 10 Flammability Not identified Colloid stability, % mass of separated oil, % 10 Flammability Not identified Colloid stability Not self-flammabile Explosion limits In part of the product is stable under normal use conditions and storage.	Firefighting tools	Carb	rbon dioxide and powder fire extinguishers.			
Means of individual protection Protective suit, respirator, isolated gas mask. VI- MEASURES OF PREVENTING AND LIQUIDATION OF ACCIDENTS AND EMERGENCES In case of definition that one or more bottles are non tight it is needed to delete defected bottles on open space. In case of gas leaks protect anatomical airways. After gas leak reclaim bottles. VII- STORAGE REGULATIONS OF CHEMICAL PRODUCTION AND ITS TREATMENT UNDER HANDLING OPERATIONS General safety rules Under normal use of the product is stable and does not require special protective equipment. Do not use near fire and hot surfaces. Do not smoke Handling It is not necessary under normal use. Keep away from fire and sunlight Recommended materials It is not necessary under normal use. VIII- CONTROL MEASURES FOR HAZARDS AND MEANS OF INDIVIDUAL PROTECTION General information Under normal use of the product preparation, product is stable and todesn't require special protective equipment. Preparation of the product is related to hard-combustible and low-toxic products. Protection of breathing It is not required under right application. Protection of skin It is not required under right application. Protection of skin It is not required under right application. Protection of skin It is not required under right application. Protection of hands Use rubber gloves. X - PHISICAL AND CHEMICAL PROPERTIES Physical condition Aerosol grease Color Brick color liquid Not identified Melting point Not identified Not diffied Colloid stability, % mass of separated oil, % 10 Flammability Not self-flammability Not self-flammabile Explosion limits Iower 1,8% - Upper 8,4% Not soluble Material is stable under normal use conditions and storage.	Special hazard	Risk is not identified.				
VI- MEASURES OF PREVENTING AND LIQUIDATION OF ACCIDENTS AND EMERGENCES In case of definition that one or more bottles are non tight it is needed to delete defected bottles on open space. <u></u>	Hazard of polymerization		Not hazardous			

		MATERIAL SAFETY DATE SHEET		
ncompatibility		With strong oxidants and alcali		
Hazardous products of decomposition		Under normal storage conditions, formation of hazardous products is not supposed.		
		XI -TOXICOLOGICAL INFORMATION		
Irritation of skin		Slight irritation		
Irritation of eyes		Slight irritation		
Other toxicological information		Information is based on properties of raw materials. It is not proved its carcinogenic or mutagenic property.		
		XII – ECOLOGICAL INFORMATIOM		
Eco-toxicological data we The information above products.		pecially for this product. wledge of components and results of eco-toxicological research of analogue		
Acute toxicology	under conce pools.	Product is considered non-toxic. Mineral oil does not make chronic action on water organisms under concentration less than 1mg/l. It has slow toxic effect on fish and micro flora of water pools. In water and air in the presence of other substances does not form toxic compounds.		
Movement		Product is not mixed with water. Under penetration in soil it is absorbed with its particles.		
Stability		Product is not fast bio-degradable. Basic components are bio-degradable, but product has non bio-degradable substances.		
Bio-accumulation		Some components can accumulate in alive organisms.		
Other impacts		posed a possibility of destruction of ozone layer and influence on global warming.		
Protection of environment wastes are absent.	ent is provided ur	nder production with hermetically sealed technical equipment. Liquid and solid

XV - NATIONAL AND INTERNATIONAL LAGISLATION

Technical name: AEROSOLS

EMS: F-D, S-U

ICAO/IATA: 21

UN: 1950

Laws of Russian Federation:

"About technical regulation";

"About environmental safety";

"About sanitary-epidemiological well-being of the population".

Under the international conventions and agreements it is not subjected.

XVI – ADDITIONAL INFORMATION

Contents and form of the given document corresponds to requirements:

- 1. GOST 30333-2007 "Passport of safety of chemical production. General requirements".
- 2. GOST 12.1.007-76 « Harmful substances. Classification and general safety requirements".
- 3. GOST 12.1.005-88 «General sanitary-epidemiological requirements to air of working zone".
- 4. GN 2.1.5.1315-03 "Maximum permissible concentration of (MPC) of chemical substances in water of water pools for household-drinking and cultural-household water management".
- 5. ΓΟCT 19433-88 «Hazardous loads. Classification and labeling".

Information in this Safety Card corresponds to the latest modern level of our knowledge about product.

Product is applied and used in accordance to given advises. Information in this Safety Card does not compile instruction on the workplace.

Data contains in the given document have to be opened to any potential users of this product.

Utilization recommendations:

This product is applied and used as compound for sealing of threaded connections as specified in instruction on package for sealing of threaded connections.

Data: Abbreviation: N/A = was not identified:

N/D = is not determined.

For getting additional information about product, contact Sales Department of VMPAUTO LLC (Tel/Fax: +7 (812) 601 05 59.
